

Mandatory training for certain PUR adhesives in the E.U.

For safe handling of these products

For handling certain products containing diisocyanates in the industrial and commercial sector, a mandatory training was determined as a part of the REACH Regulation. The training should be completed by August 24th, 2023.

The regulation in detail:

- **Training** for your employees for the safe handling of certain PUR adhesives. As of **August 24th, 2023**, the product subject to the restriction is not allowed to be used without training.
- **Training for all industrial or commercial users** of products with a total concentration of monomeric diisocyanate of >0.1 %; currently the following AKEMI® products are affected:

AKEPUR 150 SANDWICH ADHESIVE	Art. No. 11497, 11583
AKEPUR 250 HIGH TACK	Art. No. 11488, 11489
AKEPUR 1100 HIGH VOLUME FILLER	Art. No. 11594
BS 220 Silicate Repair Resin	Art. No. 50318
EVERCLEAR 505	Art. No. 11487
PR Speed 1 Min	Art. No. 87307
PU Flex Fast	Art. No. 87830
PU Primer Black	Art. No. 87829

- The following **online training portals** have been set up:

www.safeusediisocyanates.eu

www.feica.eu/our-projects/safe-use-diisocyanates

www.fsk-training.de/en

After participation in this training and successful completion of the final examination, a certificate is acquired which is valid for 5 years. **Documented proof** of the training is mandatory.

- There is no mandatory training when buying or selling the products. However, the **retailers** must make sure the information is provided to the users of affected PUR products.

Currently affected AKEMI® products:
